

ProDES • MANAGEMENT SOFTWARE TO FLASHERS

La Maquinista Valenciana provides a software management for the flash range series DES that allows full control of operating parameters, and the selection of the rate of flashes, including the edition of the four patterns that the user can program at your choice. Communication between the software and flasher is achieved through the communication cable DES-COM.

Features

- Choice of flash rates.
- Programming user rhythms.
- DIMMER configuration mode.
- Selection of thresholds day / night.
- Programming LVD function. (Low Battery Disconnection)
